Test Components/Stations:

Candidates will go from Stations I through III in order. Each station is pass/fail. Candidates must pass each station in order to proceed to the next station. Candidates will be allowed up to three minutes rest between stations. Once a station is started, it must be completed according to protocol. See the following chart.

Station I

floor. To pass this component, candidate must complete the requisite number of correct sit-ups in one minute.

Station II

Push-Up - This test measures muscular endurance of the upper body (anterior deltoid, pectoralis major, triceps). The hands are placed slightly wider than shoulder width apart, with fingers pointing forward. The monitor places one fist on the floor below the candidate's chest. If a male monitor is testing a female, a 3-inch sponge should be placed under the sternum to substitute for the fist. Starting from the up position (elbows extended), the candidate must keep the back straight at all times and lower the body to the floor until the chest touches the monitor's fist. The candidate then returns to the up position. This is one repetition.

The candidate's score will consist of the number of correct repetitions performed without break (i.e. failing to extend the elbows, one or both knees touching the floor, hitting the floor, remaining on the floor, stopping).

Station III

Mile Run - Candidate must be successful on Stations I and II in order to participate in Station III. It will be administered over a course of 1.5 miles. Candidate will be informed of his/her lap time during the test.
